

SERIE RS

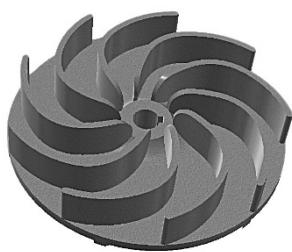

Elettropompe sommergibili con girante arretrata a vortice, idonee a convogliare liquidi carichi fognari con corpi solidi grossolani e fibre lunghe.

Gli ampi passaggi liberi offrono l'opportunità di operare in molteplici applicazioni in campo industriale, zootechnico e nella depurazione delle acque per il pompaggio di acque grezze e fanghi attivi anche con presenza di gas ed aria.

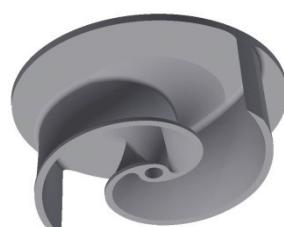

RS SERIES

Submersible electric pumps with vortex impeller suitable for conveying sewage loads liquids with coarse solid bodies and long fibers.

The wide free passes offer the opportunity to operate in many applications in the industrial, zootechnical and water purification fields, for the pumping of the raw water and activated sludge even with the presence of gas and air.

CAMPPI DI FUNZIONAMENTO - OPERATING RANGES

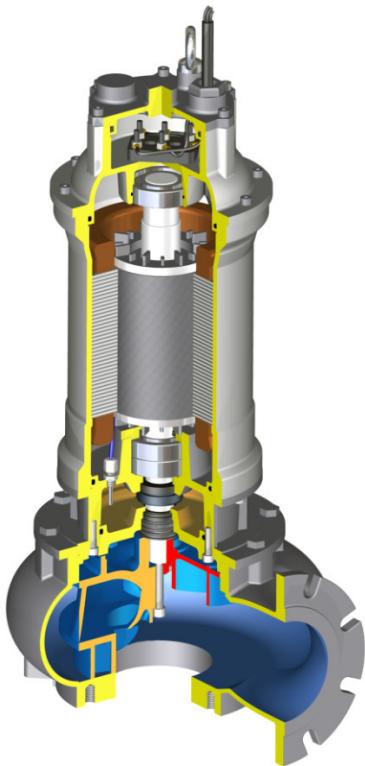

1.5 ÷ 4 kW

7.5 ÷ 13.5 kW

15 ÷ 18 kW

Motore M: 22 ÷ 30 kW

MOTORE

Asincrono trifase a gabbia di scoiattolo, con raffreddamento tramite liquido circostante. Fattore di servizio S1 con motore completamente immerso.

Isolamento motore: classe F-H ; protezione IP 68.

Temperatura massima del liquido: 40°C

COOLING SYSTEM

Asynchronous three-phase motor in squirrel cage type, with cooling through surrounding liquid. Service factor S1 with fully immersed motor.

Motor insulation: class F-H ; IP 68 protection.

Maximum liquid temperature: 40°C

SUPPORTAZIONE / ALBERO

Cuscinetto superiore radiale chiuso a una corona di sfere, con lubrificazione a grasso permanente.

Cuscinetto inferiore radiale obliqui chiuso a doppia corona di sfere, con lubrificazione a grasso permanente.

Ridotta sporgenza dell'albero e cuscinetto inferiore bloccato meccanicamente consentono di ottenere una supportazione robusta e compatta, a beneficio di affidabilità e durata.

SUPPORTS

Upper bearing: radial, single-row ball, closed, with permanent grease lubrication.

Lower bearing: radial angular, double row ball, closed, with permanent grease lubrication.

The reduced shaft protrusion and the mechanically locked lower bearing allow for a robust and compact support, to the benefit of durability and reliability.

DISPOSITIVI DI CONTROLLO

Disponibili sensori termici (Klixon) negli avvolgimenti del motore per segnalare eventuali surriscaldamenti, e sensore di infiltrazione inserito nella camera tenute.

CONTROL DEVICES

Available thermal sensors (Klixon) in motor windings to signal overheating, and infiltration sensor inserted in the chamber.

TENUTE MECCANICHE

Sistema con doppia tenuta meccanica in camera olio di adeguata capacità, per lubrificazione e raffreddamento ottimali. Tenuta lato liquido in carburo di silicio SIC/SIC, tenuta lato motore realizzata in grafite/allumina.

MECHANICAL SEALS

Double mechanical seals in oil bath for optimal lubrication and cooling: liquid side seal in silicon carbide SIC/SIC, motor side seal in graphite / alumina.

MATERIALI

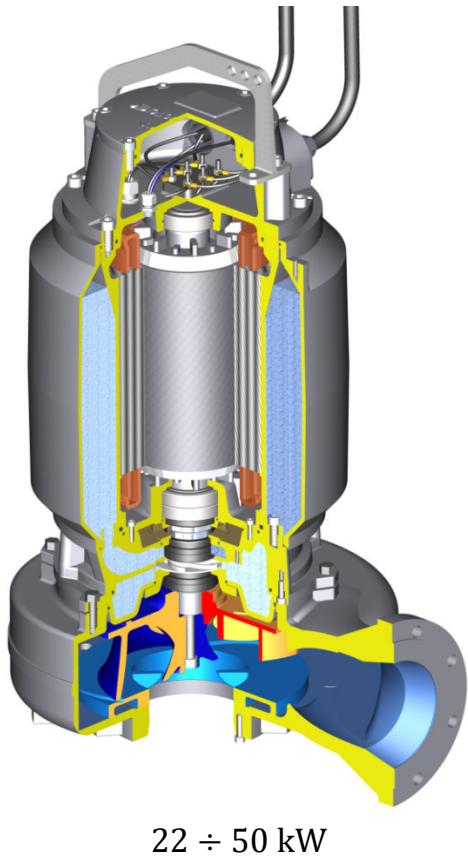

Fusioni principali in ghisa GG25. Albero in inox AISI 420.

Per la serie BT girante e diffusore sono in ghisa GS500, con trattamento di indurimento supplementare per la versione chopper.

MATERIALS

Main castings in cast iron GG25. Shaft in S.S. AISI 420.

For BT series impeller and diffuser are in cast iron GS500, with additional hardening treatment for chopper version.

22 ÷ 50 kW

SISTEMA CON CAMICIA DI RAFFREDDAMENTO A CIRCUITO CHIUSO

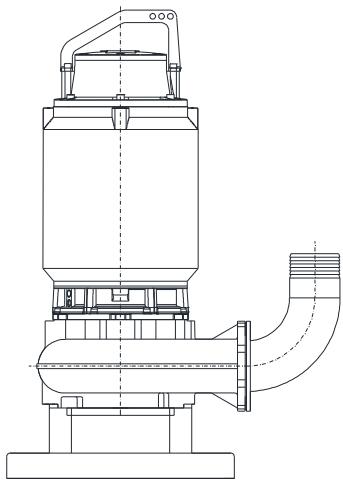

Per potenze a partire da 22 kW è disponibile, per le installazioni a secco in camera asciutta, un sistema di raffreddamento con circolazione forzata di liquido refrigerante tramite opportuna girante integrata.

SYSTEM WITH CLOSED CIRCUIT COOLING JACKET

For powers from 22 kW, a cooling system with forced circulation of coolant is available for dry installations through a suitable integrated impeller.

MODELLO TYPE	LUCE DI PASSAGGIO GIRANTE IMPELLER PASSAGE LIGHT
80/100 4P	50x68
80/100 2P	45x40
150 4P	65x80
200 4P-6P	90X120
300 6P	100X140

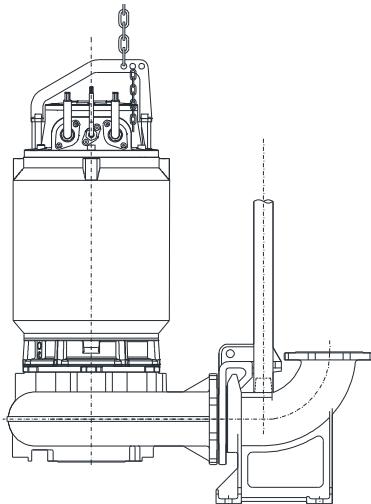

TIPOLOGIE DI INSTALLAZIONE

MOBILE – PORTABLE

Con base di sostegno e controflangia di per tubo di mandata rigido o gomito flangiato portagomma in ghisa (DN65÷150).

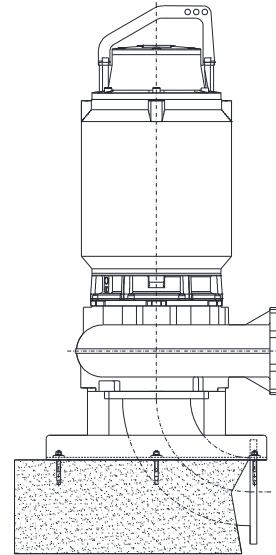

With support base and counter-flange for rigid delivery pipe or flanged elbow cast iron hose (DN65 ÷ 150).

FISSA – FIXED

Con tubi guida per l'estrazione della pompa e dispositivo di accoppiamento automatico fissato al fondo del pozzo.

With guide tubes for pump extraction and automatic discharge connection bracket fixed to the bottom of the well.

A SECCO – DRY

Configurazione orizzontale con corpo dotato di zampe, oppure verticale con base di sostegno.

Horizontal configuration with body with legs, or vertical configuration with support base.
